

# How To: Take a Counter Reading

Take a Counter reading each time you remove money.

1

The control board is located on the shelf inside the machine.

2

Look for the black button on the control board directly under the hole in the lid.

3

Use a coffee stir stick or other implement to **PUSH** and **HOLD** the button (4 seconds).

4

hold down until light flashes

Hold the button down until this light begins to flash.  
(yellow circle around light)

You can then release the button.

5

In the above image, the counter number is the 6.

This is the cumulative sales for the machine.

## note

The counter number registers each coin received by the machine and is non-reversible.

You should keep track of the date of each reading and how much money was collected.

This number is sent to headquarters daily via the cellular device.
