

How To: Work the Lock

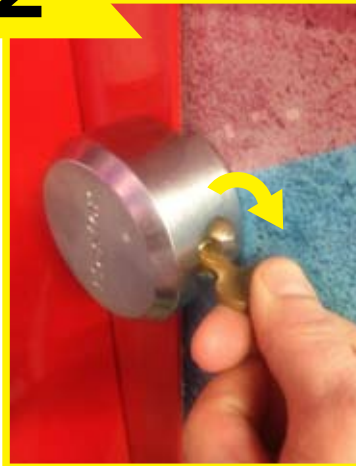

The lock can be tricky. Unlock the secret to less frustration... read below!

1

Insert the key into the lock.

2

Turn the Key ONLY 90° clockwise.

3

Pull the key and the locking mechanism will come out as pictured.

4

Make sure the key is still turned when you put the lock back on.

5

Push the key back in all the way and then rotate the key 90° counter-clockwise and then remove the key.

note

Sometimes it is necessary to relieve pressure on the lock by leaning into the door with your shoulder while you perform steps 3-5.
